Immersion and gravity method
CLEVER

This preparation method uses both immersion and gravity

Firstly by immersing and steeping the coffee in water followed by a gravity induced filtration.

E.K. Int'l Co Ltd
Clever Dripper

Light Roast
Coarse Grind

How to do it?

Dose
Use 20 grams of ground coffee for every 300ml of water.

Prepare
Place the filter and rinse off with hot water to clean any residuals on the filter.

Fill
Add the coffee and the hot water and let it steep for 2 to 3 minutes. The gravity filter system starts once the clever is placed on a cup or server and engages the safety valve to open and commence the filtration.
Lifting the Clever will close the valve and interrupt the flow and filtration

Serve
Remove the Clever to reveal a coffee ready to enjoy.
