

FILTER MACHINE

An automatic preparation method, extracting filtered coffee in a practical way combined with an elegant design

This coffee machine is characterized by its clean extraction since the filter retains all the insoluble solids

How to use it?

Use 60 grams of coffee for every liter of water

Dose

Prepare

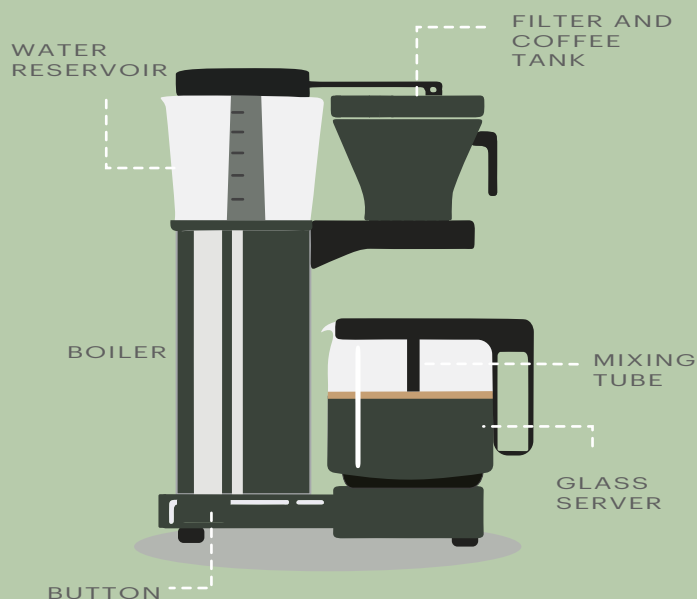

Fill the water reservoir with preferably soft water (low in mineral compounds)

Place the filter in the corresponding tank and add the ground coffee

Place

Infuse

Press the extraction button to start the infusion and wait for the infused coffee to pass through the tube filling the server or thermos. After a brew time of 6 minutes the coffee will be ready to serve.

MOCCAMASTER

KBG

Light Roast
Coarse grind
