

Pressure Method

CAPSULE MACHINE

Preparation method that extracts the coffee by pressure with ease and speed

The capsule machine makes the coffee by injecting water into the capsule at high pressure

How to do it?

Choose a single-dose capsule or prepare it yourself with a refillable model (in this case, use 5-7 grams of coffee)

Choose

Prepare

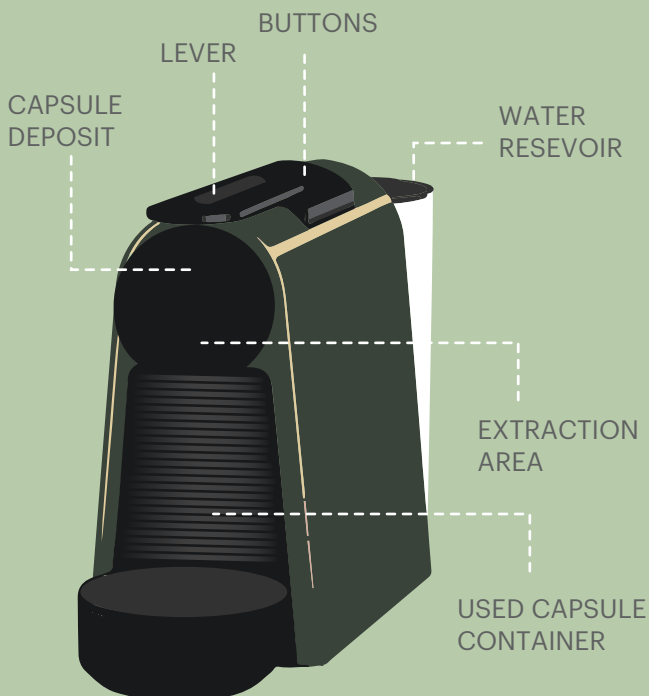

Fill the water tank with a recommended soft water.

Turn on the machine and lift the lever to be able to place the capsule in its space.

Place

Infuse

Once the light of the button has stopped flashing, press the button of your choice for either a short or long coffee.

Essenza Mini

Medium-Dark roast
Very fine grind
